EEC Practical 3: Niche and Resource Partitioning

Project Figures and Visualizations Report

Figure 1: Bird Count Histograms per Species

These frequency distributions display the number of observed habitat patches falling into each specific count range for every recorded bird species.

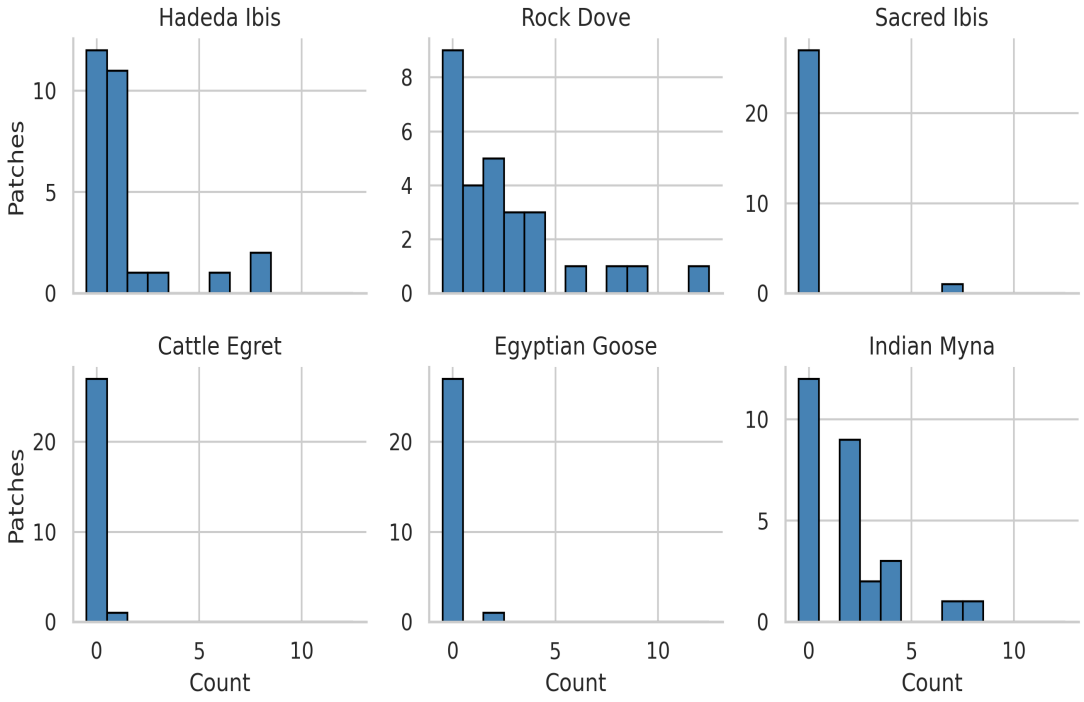

Figure 2: Box-and-Whisker Plot of Counts by Species

This chart shows the spread, median, quartiles, and outliers of the recorded counts for each of the six monitored bird species across all 28 habitat patches.

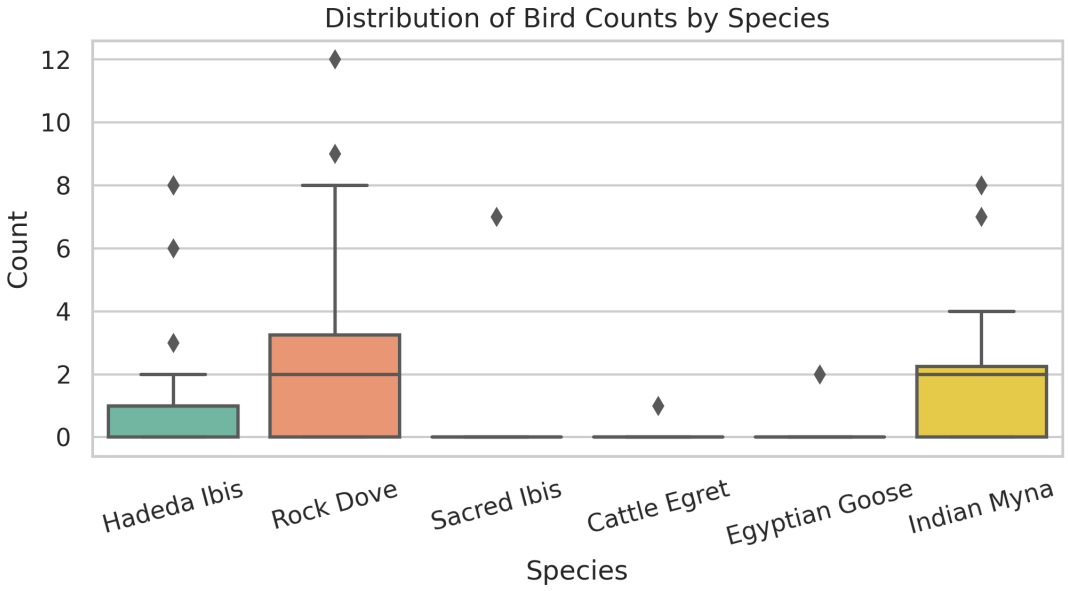

Figure 3: Box-and-Whisker Plot of Counts by Habitat Patch

This plot visualises variation in total bird usage patterns across all 28 specific geographic patches included in the Wits University dataset.
